THE COMPONENTS OF THE CAMELEON MANNEQUIN,
4 TYPES OF FACE OPTIONS FOR MAXIMUM FLEXIBILITY.

COMPONENTS: The CAMELEON concept is a made up of a series of interchangeable faces, eyes and lips that clip into place with the utmost of ease using magnetic fittings. The eye and lip components are manipulated with a specially designed magnetic pen equipped with a neck-strap.

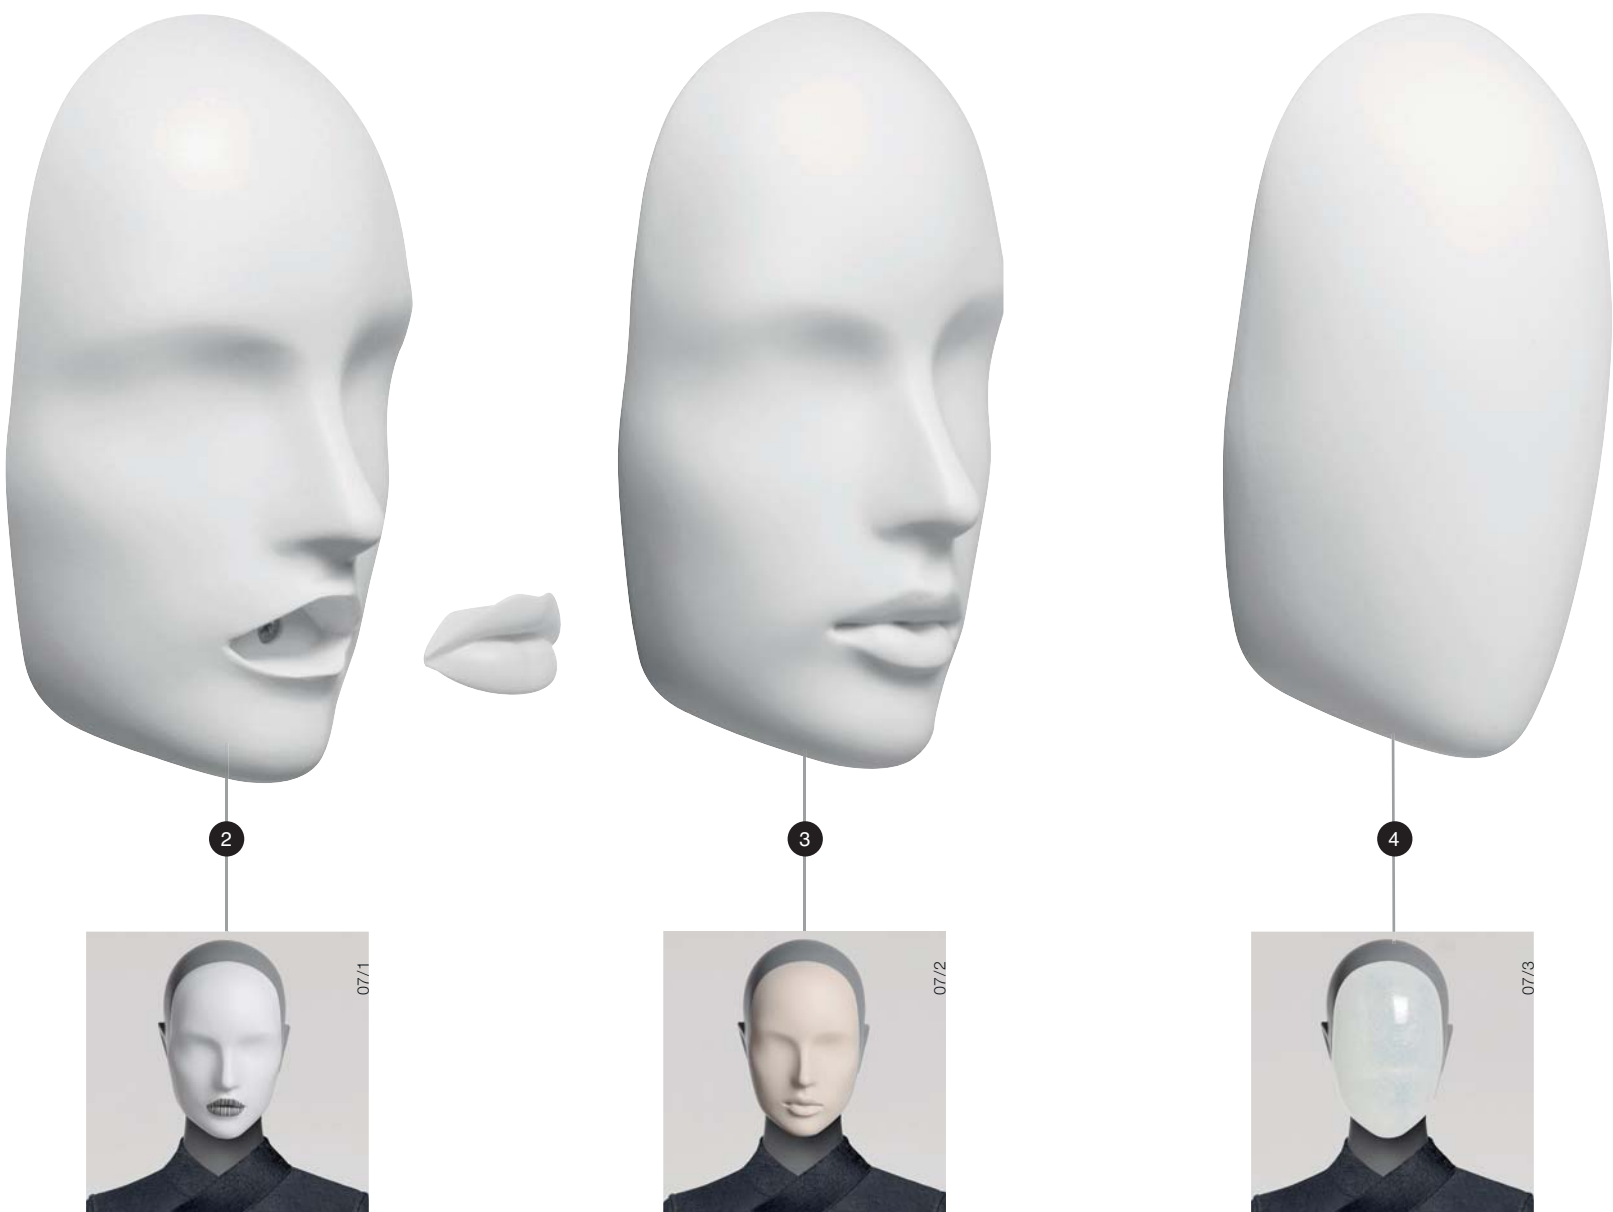

BODY/HEAD: The bust and back of the head come in one piece and are available in two different tones of grey (light grey and dark grey) and a high gloss or matt translucent resins (other colors are available upon request). The lighter tone matches the light grey colour option of the faces and marries harmoniously with the light skin coloured realistic faces. The darker grey tone of body gives a more dramatic look creating a strong contrast between head and face.
